DOCUMENT-IDENTIFIER: US 6623529 B1

TITLE: Multilingual electronic document translation, management, and delivery system

Application Filing Date (1):  
19990128

Brief Summary Text (8):

Web pages locally. The Web site visitor sends a request to the Web server for a page in a specific language. The Web server searches for the pre-translated page that has been stored locally and sends it to the Web visitor's Web browser. This creates a storage and file management problem on the Web server because of the duplication of each entire page of the Web site.

DOCUMENT-IDENTIFIER: US 6526426 B1  
TITLE: Translation management system

Application Filing Date (1):  
19990128

Brief Summary Text (7):

An alternative implementation in the above application places pre-translated Web pages on a Web server. The Web server stores all of the translated Web pages locally. The Web site visitor sends a request to the Web server for a page in a specific language. The Web server searches for the pre-translated page that has been stored locally and sends it to the Web visitor's Web browser. This creates a storage and file management problem on the Web server because of the duplication of each entire page of the Web site.
